

Priority Wire & Cable is a modern manufacturer and premier supplier of aluminum building wire and armoured cable, along with copper portable cord and mining cables, copper Teck90, data and electronic cables, Flexitel Central Office Power Cable, and PV solar cables. In 2018 we've been celebrating our 25<sup>th</sup> Anniversary, and we're entering our 10<sup>th</sup> year of business here in Canada.

Speed of service is our key feature, and 98% of orders ship the same day from our 1.7 million square feet of warehouse space across fifteen North American distribution centers (one in Toronto and fourteen in the U.S.). We sell only to wholesale distribution, and delivery to most customers is next day. This allows us to provide a product offering and world-class service level unmatched by other industry factories or brokers.

If you are a current customer, thank you for your business! You have helped us become the fastest growing wire and cable supplier in the industry. If you are a potential customer, we hope you give us a chance to prove why we are growing so fast.

We're located at 6865 Northwest Dr, Mississauga ON, and can be reached at 1-877-611-5122, [www.prioritywire.ca](http://www.prioritywire.ca)
