

April 29<sup>th</sup>, 2025

Rt. Honourable Mark Carney, P.C. M.P.  
Prime Minister of Canada  
Office of the Prime Minister  
80 Wellington Street  
Ottawa, ON K1A 0A2

Via email: [PM@pm.gc.ca](mailto:PM@pm.gc.ca)

Dear Prime Minister Carney,

On behalf of Electro Federation Canada (EFC), I write to formally and sincerely congratulate you on your victory and the successful election on Monday evening.

EFC represents more than 230 member companies that manufacture, distribute, market, sell, and maintain a wide range of electrical and automation products.<sup>1</sup> These products represent the supply chain of critical parts, components, and equipment used to power industries across North America, from energy and manufacturing to transportation and construction. Our organization and its members are focused on supporting Canada's transition to a low-carbon economy through strengthened infrastructure, resilient supply chains, and a modern, sustainable electrical sector. EFC members contribute over \$15.1 billion to the Canadian economy annually and support over 109,000 jobs across the country.

We were appreciative and excited to see the inclusion of the Clean Economy Investment Tax Credits (ITCs), the East-West energy corridor, and further investments in clean energy in your campaign platform, as we see these as vital for the economic and security interests of our country.

As Canada looks to bolster its economy and enhance its energy security in the coming months, we look forward to working with you and your Ministers on shared national priorities in energy, electrification, and industrial innovation. It is our hope that we can continue to collaborate on the work we've done to date, as well as to address important matters to our industry and our members. These matters include a ramp up of deep retrofits and fuel switching in buildings and homes, a longer-term plan for EV Charger buildout, continued support and funding on the deployment of clean energy and regional electricity transmission infrastructure, a review on demands for critical minerals, and most germane to our industry at the moment, the expansion and

<sup>1</sup> Products examples include distribution equipment, transformers, switchgears, electric vehicle chargers, lighting, motors & generators, cables & wires, wiring supplies, industrial controls, enclosures, and automation/optimization software.

inclusion of grid optimization equipment and their manufactures in the Clean Technology Manufacturing ITC.

Thank you for your time and consideration on these important matters. Congratulations once again and we look forward to speaking soon with you and your team. Together, we can build a stronger, more sustainable, and more connected Canada for generations to come.

Sincerely,

Carol McGlogan  
President and Chief Executive Officer  
Electro Federation Canada
