Import Volume - definition and source

U.S. general imports from Canada only, customs value in USD, calendar year 2025.

Source: U.S. Census Bureau, International Trade API (timeseries/intltrade/imports/hs), variable GEN_VAL_YR at time=2025-12, CTY_CODE=1220 (Canada), COMM_LVL=HS10. Data pulled August 7, 2026, and so reflects the Census revisions to 2023-2025 records published June 20, 2026. Figures are hardcoded from that pull, not calculated.

43 of the 44 lines matched the source data. HTS 8543709960 (row 30) is left blank: no row was returned for it, and the whole 8543.70.99 subheading is absent from the 2025 dataset while 8543.70.98 lines are present. That pattern indicates the code was renumbered, not that imports were zero, so it should not be read as \$0. Note that row 29 (8543709860) carries the same description; if 99.60 was in fact renumbered to 98.60, its trade is already captured in row 29 and adding a figure here would double count. Confirm against the current HTS before using this line.

Sum of the 43 populated lines: \$4,668,543,211
